

September 30, 2024

Dear Mayor Mendenhall,

The Racial Equity in Policing Commission has reviewed applications and would like to recommend Ms. Cenezhana Rokhaneevna to become a commissioner. Ms. Rokhaneevna currently serves as the STEMCAP Program Coordinator at the University of Utah helping Youth-In-Custody learn about education and career opportunities within STEM fields. Further, she works to build and maintain partnerships with well-known local organizations, including the Delta Center, Huntsman, Cancer Institute, University of Utah School of Dentistry, Utah Transportation Authority, Natural History Museum of Utah, and Tracy Aviary to expand youth-in-custody career and college readiness programming initiatives. Additionally, Cenezhana also continues to serve as a Community Health Worker at the University of Utah and Utah Department of Health. As a current doctoral student expected to graduate in December 2025, she is focusing her dissertation research on evaluating internal corporate social responsibility initiatives by global companies in addressing social determinants of health among refugee employees. The Commission strongly believes this is a perspective that they could use to further ongoing priorities and strengthen relationships with the specific population she represents.

Again, on behalf of the REP commission, we recommend Ms. Cenezhana Rokhaneevna. Please see the attached file for her application and resume. If you have any questions, please let us know.

Sincerely,
