COVID-19 update

Current metrics

- Salt Lake County is back in the "moderate transmission" level, according to state guidelines.
- No SLC zip codes are above the 191/100,000 crude positivity rate.
- Vaccinations in the Central City and West Side areas are still behind the east side, which is about 55-64% fully vaccinated.

West Side vaccination rates

	May 25	June 1	June 8	July 13
84101	55.8% full 15.68% partial	58.73% full 13.99% partial	60.80% full 13.11 partial	68.5% full 11.66% partial
84104	28.37% full 9.03% partial	30.31% full 9.03% partial	31.82% full 8.03% partial	37.72% full 6.19% partial
84116	31.05% full 9.06% partial	33.74% full 8.39% partial	35.07% full 8.01% partial	41.26% full 5.96% partial

Non-Hispanic ethnicity	39.46%	40.99%	42.28%	47.37%

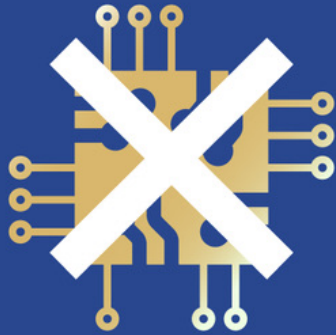

COVID-19
update

Recent “vaccine attitude” data from the State DOH

- ~26% of unvaccinated people are probably not swayable
- nearly half of those unvaccinated—46%—are still “very likely” to get vaccinated and 16% are “somewhat likely.”
- **The good news is that ~62% of unvaccinated Utahns (including about 72% of Salt Lake County residents) are still interested in being vaccinated.**

COVID-19
update

VACCINE FACT #1

*The COVID-19 vaccine
does not contain
microchips or tracking
devices of any kind.*

Know the facts, then get the shot.
Visit [ThisIsOurShot.com](https://thisisourshot.com) for vaccine locations.

VACCINE FACT #2
