COVID-19 Update

booster FAQ

What's the difference between Pfizer and Moderna boosters?

Beyond the difference in age criteria, there is no practical difference between the shots. Pfizer is available to age 5 and up; Moderna is age 6 and up.

How long should I wait to get the new booster if I recently had a shot or got Covid?

As soon as two months, but ideally between 4 and 6 months.

Monkeypox Update

Since May 2022, 160 confirmed and probable cases of monkeypox have been reported in Utah.

- Central Utah: 1
- Davis County: 16
- Salt Lake County: 134
- Summit County: 2
- Tooele County: 2
- Tri-County: 1
- Utah County: 18
- Weber/Morgan: 10

The Monkeypox vaccine is currently available to:

- Any sexually active man, or transgender or nonbinary person who has sex with men.
- Anyone who, in the past 6 months, has had sex in a commercial sex venue or in association with a large, public event

If you meet the criteria you may call 385-468-SHOT (7468) to schedule an appointment for vaccination.

Flu Update

Flu season is HERE

- Flu activity tends to ramp up in October then peak between December and February — and significant activity can continue as late as May, according to the CDC.
- Experts are concerned about a "twindemic," a surge of both COVID and the flu, this season given some flu trends coming out of the southern hemisphere.

Vaccinations are key:

- Everyone 6 months and older should be vaccinated.
- Most people only one dose of flu vaccine for the season.

Find your nearest flu vaccine by visiting [**www.vaccines.gov/find-vaccines**](https://www.vaccines.gov/find-vaccines)

- Stakeholder meetings beginning

[Alternatives Public Comment Period Now Open - Learn More](#)

Alternatives Phase Overview

As part of its mission to improve quality of life through transportation, the Utah Department of Transportation (UDOT) has initiated an environmental study along the I-15 corridor between Farmington and Salt Lake City.

The team has identified the purpose of the study and defined the transportation needs along the I-15 corridor and in the surrounding communities. With the public's input and based on technical analysis and engineering, the study team has identified potential improvements – known as alternatives – within the corridor. These alternatives are now available for public review and a Public Comment Period is now open and runs through Dec. 16.
